EQUIPMENT

ALT - Q - NP -60 Channel Eight Treasure Porridge Tank Discovery	03
ALT - Q - NP -36 Channel Lunch Bar Mortar Leakage Machine	03
ALT - Q - AC -18-24 Channel gas fog tank leak detection machine	04
ALT - Q - AC -36-48 Channel gas fog can leakage machine	04
ABM - Aerosol can blasting machine	05
ALT-A -10-18 liter large can	06
ALT-A -1-7 liter large can	06
ALT-Q-18L -18 liter large can	07
ALT-Q-18L -18-20 liters convenient barrels	07

ALT-Q-NP Food can fully automatic airpressure leakage machine

**60 Channel Eight Treasure
Porridge Tank Discovery**

Feature:

- Fully meet the realization of the canal diameter Φ 64 ~ 83mm
- the tank height of 60 ~ 200mm gas fog can Product production technology requirements test
- providing a maximum 48-channel model
- detection speed 200-600/minute testing is the best choice equipment for gas fog cans.

**36 Channel Lunch Bar Mortar
Leakage Machine**

ALT - Q - AC fully automatic turntable type gas fog tank leakage machine

**18-24 Channel gas fog tank leak
detection machine**

Test sample

**36-48 Channel gas fog can
leakage machine**

Feature:

- Fully meet the realization of the canal diameter $\Phi 45 \sim 65\text{mm}$.
- The pot height of 50 ~ 300mm gas fog can Production technology requirements for product production provides a maximum 48-channel model.
- The detection speed is 80-500/minute testing is the best choice equipment for gas fog cans.

ABM Aerosol can blasting machine

Feature:

- Historical records of test results. The system stores the last 8 test information per channel to facilitate the adjustment of the operator's parameters and improve efficiency
- Select high-precision detection element PT, blur logic control, high-performance servo control system
- Operation performance: flexible pressure adjustment, step-type pressure display, hand-in-one test method.

ALT-A-type chemical tank fully automatic air pressure leakage machine

10-18 liter large can

Test sample

1-7 liter large can

Feature:

- Provides performed in the movement maximum 16-channel models
- The quality control of front level air tight detection of various types of told taught tank lines is provided
- Detects products: 1-7 liters small cans and 10-18 liters large can

ALT-Q-18L fully automatic turntable chemical tank leakage machine

18 liter large can

Test sample

**18-20 liters
convenient barrels**

Feature:

- Provide a maximum 24-channel model with a detection speed of 35-60 minutes
- Touch HMI provides rich system information and operating information
